# ST Crack Sheet

## A recyclable asphalt crack suppression sheet

### Overview

- This is a reflection crack suppression sheet using modified asphalt with glass fiber cloth as the core material.

### Features

- There will be no breaking due to crack movement thanks to its high tensile strength.
- It can be placed irrespective of crack direction.
- It has excellent adhesion to the base with strong adhesiveness and exclusively-used primer.
- Easy to cut with a cutting machine.

### Applications

- Maintenance and repair of asphalt pavement
- Suppression of reflection crack at composite pavement joints
