(Resin-based, Other)

# Urban Court, Hard-Type

This is a sports surface designed for landscaping and economic efficiency. It is often used for landscaping such as at train station platforms.

## Overview

- Surface course material that uses an acrylic resin as the main material.
- It is a product configured from a level coat, base coat, and top coat, etc., and has excellent durability.

## Features

- Great strength, excellent oil resistance, acid resistance, and wear resistance.
- Excellent weather resistance, virtually no discoloration, fading, or degradation even when used outdoors.
- Relatively inexpensive and easy to repair.

## Applications

- Tennis courts
- Parking lots
- School playground pavement
- Colored pavement
- Promenades
- Multipurpose open areas
- Basketball courts
- Roller-skating rinks
- Free basket
- Jogging paths
- Station platforms
- Three-on-three
